EDUCATION

University of Georgia

Bachelor of Science, Computer Science

May 2026

Athens, GA

- Achievements: Magna Cum Laude (GPA: 3.83), Public Health Minor, New Media Institute Certificate

SKILLS

- CSS, Dart, Flutter, Figma, Firebase, Git, HTML, Java, JavaScript, React, SQL, SwiftUI, Tailwind, TypeScript, UI/UX

PROFESSIONAL EXPERIENCE

Cooper Lighting Solutions, Signify | *Mobile Software Engineer Intern*

Jun 2025 - May 2026

- Selected to return for a second internship term (Summer 2025, then Spring 2026) to complete an additional project
- Migrated the CAT mobile application from Angular to Flutter across both terms, building reusable Flutter components with Dart and delivering 15+ production-ready pull requests within Agile/Scrum sprints
- Designed and implemented landscape-responsive UI layouts across 10+ screens in Flutter aligned with Figma prototypes, improving usability and accessibility across devices
- Integrated Firebase services, Sentry monitoring, and analytics tooling into the release pipeline, improving crash visibility and bug-triage workflows
- Led UX research and design for a circadian-rhythm lighting cycle feature, running usability sessions with 4 internal testers and delivering a Figma prototype that was well received by the product team

Extern x Beats by Dre | *Qualitative & Quantitative Insights Extern*

Aug 2025 - Nov 2025

- Developed consumer insights, an Ideal Consumer List, and a Customer Journey Map using the AIDA framework, enabling the marketing team to target three high-value segments and prioritize five key touchpoints
- Performed data cleanup, quantitative analysis, and qualitative sentiment evaluation in spreadsheets, creating visual charts that revealed a 12% shift toward bass-heavy speakers and guided product-feature decisions
- Conducted EDA and sentiment analysis on 1,000 scraped Amazon reviews across 5 wireless-speaker products, creating visual dashboards, and Gemini sentiment summaries to uncover brand differences and consumer preference patterns.

PROJECTS

Wishlist | *Solo-Built Fashion Tech Product*

2026 - Present

- Designed and built Wishlist, a full-stack product (React, Supabase/PostgreSQL, Chrome MV3 extension) that lets users save items from any retailer into one wishlist and organize them into trip and event collections
- Developed a drag-and-drop "Look Studio" styling canvas and an ONNX/WASM + Gemini-powered AI outfit visualizer, cutting manual outfit-planning time by an estimated 50% versus a screenshot-and-collage workflow

Capstone Project | *Seraph Secure & UGA CARE Center*

Apr 2026

- Designed and developed an educational website in partnership with Seraph Secure and the UGA CARE Center to help older adults recognize scam tactics through accessible, human-centered design
- Led user research and iterative UX design with 10+ older-adult participants, simplifying navigation while translating complex scam information into actionable digital and printable resources

Course Project | *eCinema Booking Website*

Apr 2025

- Collaborated in a 4-person sprint-based team to build a full-stack booking platform using React with real-time seat reservations, secure authentication, and promotion code validation
- Implemented the checkout flow, multi-card payment system, and automated email confirmations using Nodemailer, and built front-end registration functionality

INVOLVEMENT EXPERIENCE

NMIXpert, New Media Institute | *Peer Coding Mentor*

Aug 2025 - Dec 2025

- Selected as 1 of 10 NMIXperts to mentor peers in coding, debugging, and iOS app design
- Led weekly sessions supporting SwiftUI projects and improving interface functionality

Google Computer Science Summer Institute | *Student*

Jul 2022 - Aug 2022

- Completed daily workshops led by Google engineers while collaborating on pair-programming projects
- Designed and presented "Haunted Manor," a scavenger hunt-style horror game using JavaScript, HTML, and Bulma CSS
